'RABBIT' VASE BY PATRICIA UROQUIOLA FOR BUDRI

"Metallics are a trend for all seasons. But it's interesting to see new interpretations: the *Triade* coffee table uses it subtly to create a point of interest as opposed to the more generous application in Knoll's chair.

My favourite exhibit: The installation at Kartell blew me away. Products were stacked layer upon layer in huge cage-like structures.

Work the trend: You can place a single piece in a vintage room with busy prints. Or you can place a contemporary metallic piece in a colonial setting and have it contrast with the wood." ●
